23 March 2020

Dear Parents and Carers

Work Experience

Please accept our apologies that, at this time, due to the ongoing and changing situation regarding Covid-19, we are still considering how this will impact our commitment to the scheduled work experience placements (29 June – 3 July 2020).

At the time of writing only one or two Employers have said that they will be unable to fulfil their commitment and so we have been pushing forward as usual to ensure every student is able to undertake a placement. However, as we are unable to predict how the virus will be manifesting itself in June and how Employers will react when trying to protect the health and safety of their own staff as well as the visiting students, we must consider alternatives.

We are currently investigating whether there are any viable alternatives such as e.g. online work experience placements, however we have drawn a blank so far.

As the situation remains fluid we must be prepared for a situation that means that – if we have returned to school - your son or daughter might be in class, catching up/revising academic subjects instead of work experience.

We hope that you understand and apologise for the disappointment this may ensue and hope that we will be able to deliver an alternative or remodelled version in the future to ensure some form of placement has taken place.

Wishing you all good health.

Kind regards

Suzanne Paice
