## Update on our Pavilion at Stoke Lodge

We are delighted to announce that we have now secured all the funding to enable Cotham School to fully repair the sport pavilion on the school playing fields at Stoke Lodge. We are pleased to have been allocated a grant from the Government's Education School Funding Agency and this has been topped up with money from the school's capital funds.

We have now appointed a local, Bristol based building company to carry out the refurbishment work. The family owned company will use a small number of Bristol based sub-contractors for specialist skills and Bristol companies to supply the building materials required to complete this project. Cotham School is pleased to be supporting Bristol businesses.

We are expecting building works to start on site very soon. The project must be completed by February 2021.

Cotham School has full approval from the City Council as the landowner to carry out the refurbishment. The scheme of works does not require planning approval. The project has full building regulation approval and complies with all other requirements for construction at Cotham School Playing Fields, Stoke Lodge.

It is great news that students, staff and sports club users will soon have a newly refurbished pavilion to use when they visit our playing fields. We know this will be very popular with everyone, and enhance our sports provision.
